

# DENMARK

Overall Index Score 80.2

Overall Index Grade A

Denmark's retirement income system comprises a public basic pension scheme, a means-tested supplementary pension benefit, a fully funded defined contribution scheme and mandatory occupational schemes.

The overall index value for the Danish system could be increased by:

- raising the level of household saving and reducing household debt
- introducing arrangements to protect the interests of both parties in a divorce
- increasing the labour force participation rate at older ages as life expectancies rise

The Danish index value increased from 78.9 in 2017 to 80.2 in 2018 due to small improvements in each sub-index.

## Comparison to other systems
